**Description**

This FT-IR database of 520 organosilicons provides a reference in the identification and analysis of silanes and silicone compounds.

Organosilicon compounds offer a unique combination of properties to suit a wide variety of industries and are important in both commercial and research applications. These compounds are the building blocks in the manufacture of products such as adhesives, additives, flame retardants, lubricants and sealants.

Bio-Rad has produced this database in collaboration with United Chemical Technologies, Inc. (www.unitedchem.com), a major supplier of silane and silicone polymer compounds.

**Additional Information Listed**

Each compound is listed by its most readily recognizable name. CAS number, molecular formula, the molecular weight, melting point, boiling point, and flash point are all given when the information is available. Purity, density, viscosity, and refractive index values are also given whenever possible. Comments are included to provide additional information on the chemical.

Each spectrum is clearly labeled with the source of sample, United Chemical Technologies, Inc., the catalog number, and the sample preparation technique used. The spectra are presented over a spectral region 3700 to 600 cm⁻¹.

**Classifications**

The compounds in the database represent the following chemical classes. Chemical classification for the compounds is based on Si linkage. More than one chemical class is listed for certain compounds where appropriate.

- Hydrogensilane - 49
- Alkylsilane - 281
- Acylsilane - 16
- Alicyclic Silane - 25
- Aromatic Silane - 79
- Silane containing Double Bonds - 14
- Silane containing Triple Bonds - 6
- Vinyl containing Silane - 84
- Silicarbon - 1
- Oxygen containing Silane - 2
- Alkoxysilane - 148
- Acyloxysilane - 16
- Acetoxy silane - 16
- Siloxane - 156
- Silanol - 8
- Silsesquioxane - 2
- Alcohol/Phenol - 7
- Carboxylic Acid - 2
- Ester - 22
- Ether - 16
- Oxide/Peroxide - 6
- Epoxy containing Silane - 6
- Methacrylic/Acryl Silane - 20
- Nitrogen containing Silane - 97
- Silazane - 10
- Amide containing Silane - 5
- Cyano containing Silane - 12
- Heterocyclic Silane - 7
- Chlorosilane - 135
- Chlorine containing Silane - 19
- Fluorosilane - 4
- Fluorine containing Silane - 14
- Bromine containing Silane - 10
- Iodine containing Silane - 3
- Phosphorous containing Silane - 3
- Sulfur containing Silane - 10
- Organometallic - 3
- Silicone Polymer - 93
