

## Raman - Biomaterials - HORIBA

Product Code - This database is available only as part of the KnowItAll Raman Spectral Library  
Spectra - 110

---

### Description

---

Biomaterials are substances that interact with biological systems. They can be derived from nature or synthesized in the laboratory. This spectral database contains reference-quality Raman spectra of biomaterials. It can be used by researchers to identify or classify spectra.

### Additional Information

---

Each record is identified by chemical name and includes the following (when available): synonyms, source of sample, origin, occurrence, recurrence, risk factors, main causes, current associations, and additional comments.

### Technique

---

All spectra were analyzed using HORIBA instrumentation. The laser power is listed for each record in the database when available.
